

O'REILLY[®]

R-Powered Excel

Month/Year

**From that's hard in Excel
to that's easy in R!**

Demo: sales-report.xlsx

Demo: sales-report-prep.r

1. Find the average sales for each category, sorted A-Z
2. Find the total sales for each region, sorted from high to low
3. Return all transactions for regions 1 and 2, sorted by id, leaving region out of the report

**Drill: Sales
report
analysis
(hint: think
pipe!)**

1. Find the average sales for each category, sorted A-Z
2. Find the total sales for each region, sorted from high to low
3. Return all transactions for regions 1 and 2, sorted by id, leaving region out of the report

Solutions:

`sales-report-analysis.r`

**Drill: Sales
report
analysis
(hint: think
pipe!)**
